

UNIVERSIDAD JUÁREZ AUTÓNOMA DE TABASCO
“ESTUDIO EN LA DUDA. ACCIÓN EN LA FE”
DIVISIÓN ACADÉMICA DE CIENCIAS BÁSICAS

February 19, 2025

To whom it may concern,

Dear Sir or Madam:

I am very pleased to introduce you one of the best students we have had in the latest years, **Iván López Mata**, whom wants to participate in a research project at your University.

I met Mr. Mata on 2018, when he was training to compete in the Mexican Chemistry Olympiad. He enrolled at the Chemistry Bachelor's degree in our University, where he took three of my courses, Thermodynamics, Solid State Chemistry and Quantum Chemistry, in all of which he excelled.

He became interested in Molecular Modelling, then joining the modelling laboratory under my direction. During his time in the laboratory he enthusiastically gave maintenance to our cluster, and compiled successfully the necessary codes, like *vasp*, to run simulations in solid state models.

Mr. Mata has those particular skills desirable in a student to undertake a research project in sciences: strong mathematical, physical chemistry and computational knowledge, scientific thinking and great scientific communication proficiency.

If you need further information, please do not hesitate contacting me.

Best Regards,

Prof. Jose Miguel Mora Fonz

Profesor of Physical Chemistry
